

Research Prototype Idea

- Tinder-esque matchmaking system
- Check in alters the “online” status of a gym-goer
 - Automatic timeout after 60 minutes
- Users are notified if both are check in at the gym
- Messaging feature -> see when people are responding
- Leaderboards
 - Sign up to a group and enter leaderboard - use wilks score
 - Gym can configure competitions with prizes / achievements
- Every user have a profile - Alan
 - Name
 - Age
 - “Interests” in the gym
 - Experience
 - Preferred training times

Potential Feature

- Central hub that displays the leaderboards, groups etc.
